Dear Mr M Schofield

Just a short note to say a big thank you for the works carried out recently at our site at Samlesbury. The professional approach that your company presented has been noted with other members of the Facilities Management Team, and I'll be passing around your business card to other Project Managers with the recommendation that your company be employed on future scaffolding works.

The works were carried out with the minimum of disruption to the production facility in a manner that's not been seen in a long time.

Can you please pass on my thanks to all the crew that assisted in both erection and dismantling of a very complex structure in a time scale that allowed us to have an additional day cleaning, and subsequently enabled us to hand back the area to the production management with the minimum of air borne dust levels.

Kind Regards

Dave Blackburn
Facilities Management
Floor Replacement Project Manager.
